

Specifications

Introduction to Specifications

Specifications provide a helpful way to compare any asset with the correct configuration in the Price Digests database. Manufacturer publications are the main source of specification data. Though a manufacturer may typically offer many different options on any given model, the standard specifications on the most basic model is shown on each configuration.

Narrowing to a configuration Using Specifications

Specifications are an easy way to find the configuration that matches an asset. After searching for an asset using the Make, Model, Year search or an appropriate VIN on the home page, the following search screen appears:

The screenshot shows the Price Digests website search interface. At the top, the logo 'Price Digests' is on the left, and navigation links for 'Search', 'Solutions', 'API', 'Contact us', and 'Logout' are on the right. The main heading is 'Searching Commercial Trucks' with a 'Change asset type' link. Below this, there are three input fields: '2017', 'CAT', and 'CT660S', followed by a 'Search' button. On the left side, there is a 'FILTER CATEGORIES' section with a 'Clear' button and a search box. Below the search box are three checkboxes: 'Heavy Duty Trucks', 'Light Duty Trucks', and 'Medium Duty Trucks'. On the right side, there is a 'Clear All' link and a '1 Results' section. The result is displayed in a box: 'Commercial Trucks' (with a link icon), '2017 CAT CT660S', and '(2 configurations)' (with a link icon).

In this example, two configurations match this Make, Model, Year search. Confirm that the correct asset was returned and select that result. The following page will appear:

Choose a configuration

Axle Configuration	BBC	Engine Type	Gross Vehicle Weight	Is Tractor	MSRP	VIN Model Number	Wheelbase
6x4	116"	D	54000	N	142326	JG***	201
8x6	116"	D		N	177129	JH***	217

The specifications displayed here are called the display specs. These are shown to help accurately select the configuration that matches the asset. Once the correct configuration is selected by clicking on the row of display specs, the following page will appear:
